

## Angle Crashes 2009-2013 Buckeye Hills Region - Top Four Crashes

● Crash Location

Note: Anglet crashes are the fourth most prevelant in the Buckeye Hills region at 1,653. This data was accessed through ODOT GCAT, which is processed OH-1 data. Even though animal collisions were the second most prevelant, they were left out this this as there are no known ways to deter them.

Data Sources: US Census Bureau, ODOT
